PROJECTS

Scheme • An Asana clone built with Rails and React/Flux

[Live](#) • [GitHub](#)

- Maintains task sequence in linked lists for performant and scalable reordering of tasks
- Leverages websockets and the Pusher API to render new tasks and comments in realtime
- Remotely stores drag-n-drop file uploads in the cloud via AWS S3
- Includes custom form validation class and modal component for DRY, modular code

Cargo-RM • A lightweight ORM implemented in Ruby

[Live](#) • [GitHub](#)

- Implements core CRUD functionalities, association macros, and chainable queries
- Dynamically generates semantic macros via Ruby metaprogramming
- Includes convenience methods for rapidly seeding new records via CSV files

BeatWriter • A React.js typing tutor inspired by Guitar Hero

[Live](#) • [GitHub](#)

- Integrates with YouTube iFrame API to provide beat timing, audio/video, and song metadata
- Connects to Rails (Heroku) backend via JSON API so admins can “compose” new songs
